A Witness To All Nations

Artificial Intelligence

The simplest definition of AI, or artificial intelligence, is the ability of a computer or a machine to think and learn like a human.

AI, or artificial intelligence, is a branch of computer science that emerged in the 1940s, marking the beginning of a journey to replicate human intelligence in machines.

The tongue has the power of life and death, and those who love it will eat its fruit.
Proverbs 18:21

"I have spoken openly to the world," Jesus replied. "I always taught in synagogues or at the temple, where all the Jews come together. I said nothing in secret."
John 18:20

Rather, we have renounced secret and shameful ways; we do not use deception, nor do we distort the word of God. On the contrary, by setting forth the truth plainly we commend ourselves to everyone's conscience in the sight of God.
2 Corinthians 4:2

All you need to say is simply 'Yes' or 'No'; anything beyond this comes from the evil one.
Matthew 5:37

Tech Advisory Board

Roles & Composition

Speaks into the organization's overall technology strategy and how it aligns with overall goals.

Advises on emerging technologies, trends, policy, and risk management.

Members selected based on tech expertise, ministry understanding, and diverse skills.

The advisory board size is 8 to 10.

Structure

A structured agenda includes the discussion of technology projects, new technologies, risk management, and compliance.

- Meetings are held quarterly with special meetings for urgent matters.
- Participants receive an agenda and supporting materials in advance.
- The outcome of the meeting is a summary of action items and remarks.
- An executive summary will be provided to the Board of Directors outlining TAB discussion items and feedback.
